

quiz!

PWRcell or Powerwall?

PWRCell

Powerwall

Start Here

Do you already have a solar system?

Yes

Go with a Tesla **Powerwall!** The Generac PWRcell is currently only available as part of a new system. [Check out our Tesla Powerwall Guide!](#)

No

Are you looking into going solar?

No

We get it... kind of. Battery storage doesn't make a lot of sense unless you have a home solar system to recharge it when the grid goes down. P.S. Solar is really rad and [here's why you should reconsider!](#)

Yes

Does your utility require you to be on a Time of Use (TOU) rate schedule?

Yes

We'd recommend a **PWRcell** because of its high efficiency.

No

Are you looking for backup power?

Yes

Do you have a Generac Generator?

Yes

With future plans to be able to communicate with a Generac generator, the **PWRcell** is perfect for you!

No

If you're only ever planning to use a battery as a backup for when the grid goes down, we'd recommend a Tesla **Powerwall.**

If you were buying an EV, would you buy a Ford or Tesla?

Ford all the way! The **PWRcell** is going to be your go-to. Sure you can get a Powerwall, but if you're not already in the Tesla family, Generac is a tried and true brand that's built tough and packs a lot of power.
